

Foundations of Evidence-Based Strategies

Toddler & Preschool Age

10.5
hours

"Full of usable strategies that are easy to implement with young children who are on the autism spectrum as well as those who are not."

Learn Valuable Strategies Today!

Early childhood is an important time to help young children with ASD to develop critical language and learning skills. With video examples in homes and preschool classrooms, this 10.5 hour course will introduce you to evidence-based strategies that can be used in natural environments during typical routines and activities of toddlers and preschoolers.

Earn a certificate of completion and CEUs from many participating organizations.
